Description of Problem

Please include a detailed description of the issues, as well as a description of and a copy of any professional studies, citations or reports from government entities, recommended solutions, and any cost information or estimates. If additional space is needed, please attach.

Building Renewal Grant Application

Westview High School was built in 1989-1990 and we are currently having failures in the HVAC system. The actuators on the zone dampers, bypass dampers, and EMS system have failed. We also have one 5-ton a/c unit, one 2.5-ton a/c unit and one 1.5-ton a/c unit on ROTC building, and one 27.5 ton a/c unit, and two 7.5-ton a/c units on the PAC building that have failed and repairs at best last a short period. Preventive Maintenance was performed on these units in accordance to SFB standards, but these units have exceeded their design life. The estimated cost for this project is \$410,000. Although the district has been proactive in replacing units throughout Westview High School now we need your assistance in completing the final repairs. This project is critical to the operation of the school. Immediate attention is requested on this matter. I have provided a copy of an engineering study by LSW Engineers.

Project Category: HVAC

Are any of the above-described issues in buildings or part of buildings that are leased to another entity, including a district sponsored charter school? N

Available Funding

Available Funding Source	Amount
Current unencumbered building renewal fund balance (Fund 690):	\$15,749.00
Amount of Local funds planned for this project	\$15,749.00

Please outline any associated insurance coverage.
